

INSTALLATION INSTRUCTIONS

EOTech Riser YHM-220A

A competent gunsmith familiar with your firearm should install this product. Failure to install this product correctly voids any warranties of the product and removes any liabilities against the manufacturer. Be certain the firearm is unloaded and always pointing in a safe direction before starting this removal and installation process.

Tools Needed

5/32" Hex Wrench

- (1) Loosen the clamp screw to allow the riser to fit onto your upper receiver.
- (2) Place the riser in the desired location on your receiver. We recommend the securing tab is mounted in the farthest forward slot on your upper receiver to allow room to mount a rear sight.
- (3) Be certain the clamp is oriented correctly to the dovetail and hand tighten the clamp screw.
- (4) Press the riser firmly towards the muzzle and tighten the clamp screw. (Do not over tighten)
- (5) Visually inspect the riser to ensure it is seated correctly on your receiver.

Before test firing the firearm, be sure all components that were removed are re-installed and tightened correctly. It is recommended that you bench fire the firearm first to be sure everything is operating smoothly. Always handle your firearm with care being sure the muzzle is pointing in a safe direction and wear approved shooting glasses and hearing protection when using your firearm.
